

Droneguide

For play and leisure

Here are some of the rules and guidelines for using your drone for play and leisure. There are separate rules and guidelines for drones used for commercial work.

The rules are also available on mobile and web in Norwegian

www.dronelek.no and www.droneleik.no

Top 5 rules:

1. The drone should always be kept within your sight and operated in a mindful and considerate manner. Never fly near accident sites.
2. Never fly closer than 5 km from airports unless you have explicit clearance to do so.
3. Never fly higher than 120 meters off the ground.
4. Never fly over festivals, military areas or sporting events. Keep a distance of 150 meters.
5. Be considerate of others privacy. Take note of the rules concerning photos and films of other people.
