

EU and CORSIA development

Implementation of CORSIA in EU ETS

- KOM is discussing possibilities to file a difference to the whole CORSIA package OR to file differences later in the process when relevant parts of the SARPs will enter into force. UK and CH do not like the first option.
- EU:s Climate Change Committee (CCC) is discussing CORSIA MRV implementation in Europe through implementing acts. CCEG will discuss the delegated act.
- Some differences EU ETS / CORSIA:
 - scope (flights)
 - Tiered approach for MRV
 - 2 fuel monitoring options in EU ETS and 5 in CORSIA
 - Allowances within EU ETS / Offset credits within CORSIA
 - Fuel – CO₂ conversion factor of 3,15 in EU ETS and 3,16 in CORSIA

E-mail from KOM 25th of Oct

- Implementing acts regarding Monitoring and Reporting Regulation and Accreditation and Verification Regulation should be open to public consultation either tonight or tomorrow 25/10/2018) at the latest.
- For the Delegated act, public consultation dates still unclear. Tentative date for expert group meeting (CCEG) on 20/11/2018.
- Formal adoption of COM proposal for EU Council decision on Union position for State Letter reply was launched today. Expected date for adoption on 31/10/2018 and first discussion in AVIA on 9/11/2018. COM will circulate a copy as soon as it is adopted and debrief CAEP members orally. Such debrief could be done any time before 9/11.
